

# F113 Shelter-in-Place Portable Air Cleaner

The F113 Shelter-In-Place portable air cleaner offers additional protection against contaminants that may enter your indoor environment.

Tested by the U.S. Army Soldier, Biological Chemical Command (SBCCOM), the F113 Shelter-in-Place air cleaner can reduce pollutants and may extend the amount of time you are able to Shelter-in-Place.

# F113 Shelter-in-Place Portable Air Cleaner

*Protection You Deserve If Sheltering-In-Place.*

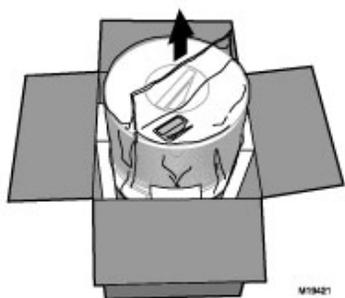

**Easy To Use** — Simply plug-in and the F113 immediately begins filtering your environment.

**Superior Performance** — Tested by the Army, the high-capacity carbon filter removes a high level of gas and odor from the air.

**Use for everyday** — Optional high efficiency media filters can improve your environment's air quality non-stop.

**Trusted Brand** — For years, Honeywell has been a leader in designing technical solutions for the toughest problems.

**High air flow** — The F113 is designed to move over 200 cubic feet per minute enhancing your shelter-in-place protection.

## *Typical Use:*

### **Unpacking and Startup Instructions:**

1. Open the box and remove the air cleaner.
2. Remove the opener attached to the top of the plastic bag. Stab the pointed part of the opener through one layer of the bag, and push the opener to cut open the bag.

3. Remove the air cleaner from the plastic bag and place the air cleaner on the floor or other solid surface.
4. Plug the air cleaner power cord into a wall outlet.

*\*The effectiveness of this air cleaner has been verified by the Department of the Army, US Army Soldier Biological Chemical (SBCCOM), and has not been independently tested by Honeywell.*
