

A portable air cleaner may help clean the air in a small room, but what about the rest of your home? Today's tightly built homes trap dust, allergens and more throughout your home. In fact, poor indoor air quality ranks among the top five environmental risks to public health. Breathe easier with the whole-house air cleaning ability of the Honeywell F52 Electronic Air Cleaner.

Unlike ordinary air filters, the Honeywell F52 captures more than 94% of particles (.5 microns or larger) that enter your home. Compare that to about 1% for a standard 1-inch fiberglass filter and you'll see why the Honeywell F52 is the perfect choice for your home and family.

F52 Electronic Air Cleaner

CLEANS THE AIR AND YOUR HEATING/COOLING SYSTEM.

The Honeywell F52 Electronic Air Cleaner may look rather simple, but it's loaded with powerful features that clean your air and save you money.

Effective Air Cleaning

- Captures particles .3 microns or larger
- Installs in return air ducts of forced air heating, cooling or ventilation systems for whole-house cleaning
- Dual-voltage cells improve particle charging and collecting
- Dramatically more effective than ordinary filters

Money-Saving Efficiency

- Cleans air before it goes into your heating/cooling system to help keep your system running effectively
- 10-Year Clean Coil Guarantee provides even more assurance that your system will operate at high efficiency
- No need to buy replacement filters – just pop the F52 in your dishwasher to restore it to full cleaning power
- Optional W8600F Air Cleaner Monitor reminds you when a wash is due
